

The Environmental Report

Living up to its mission of helping beauty brands perform, Quadpack is a global manufacturer and provider of packaging solutions. Aiming to have a positive impact on people and the planet, the group is committed to continuously improving the sustainability of its product portfolio.

The Environmental Report (ER) is an informative document that collects details of pack components and analyses their Life Cycle Assessment (LCA) data. The aim is to help customers choose their preferred combination relying on science-based information about the product's environmental footprint.

Quadpack uses PIQET's LCA tool to assess the environmental impacts and resource consumption of all packaging options. This data is then translated into our PIP rating system, which is a clear and transparent indicator of a product's sustainability level.

REGULA LIGHT 50ml

Score	LCA	Input	Environmental indicators	Circularity
-------	-----	-------	--------------------------	-------------

PIP Rating	Product type	Item code	Catalogue description	Material	Recycled content %	Renewable energy	Manufactured in EMEA	Water use volume (kL H2O) target 0	Carbon Footprint (kg CO2 eq) target 0	Circularity index target 1	Sustainable attributes
	JAR rPET	20002872	Regula Light - Jar 50ml rPET	rPET/PP	78%	Yes	Yes	0,0075	0,12	0,53	
	JAR PET	20002871	Regula Light - Jar 50ml PET	PET/PP	0%	Yes	Yes	0,0237	0,16	0,17	
	CAP DW rPET	20002779	Regula Light - DW Cap rPET	rPET/PP	65%	Yes	Yes	0,0134	0,08	0,37	
	CAP DW PET	20002778	Regula Light - DW Cap PET	PET/PP	0%	Yes	Yes	0,0144	0,10	0,17	
	CAP SW PP	20002796	Regula Light - SW Cap PP	PP	0%	Yes	Yes	0,0023	0,04	0,17	

Source: The values for the Environmental Indicators shown in this report have been calculated with the LCA tool PIQET, in September 2022.
Date: 18/04/2023
* This symbol represents a reduction of weight in the component in comparison to previous versions to achieve the minimal possible weight.

Legend

Positive Impact Packaging rating

Sustainable attributes

Definitions

Climate change in CO2: The result of global warming due to CO2 emissions released into the atmosphere as a result of the activities of a particular individual, organization, or community.

Circularity: Environmental systems that aim to eliminate waste and maximise the reuse of resources by creating a closed loop system.

Water use volume: The amount of water used in the production and supply of goods and services.

Renewable energy: Energy derived from natural resources that are replenished at a higher rate than they are consumed. Sunlight and wind, for example.
